Power UP Your Career: Contract Management In Action

Turning the alien Contract into a friend

It is a sad reality that most of the time Project Managers are hardly consulted when a CONTRACT is negotiated. If they are lucky, they are given a copy of the contract after the project is awarded.

This causes a project to be managed in a dichotomy ie project managers on one side while contract managers sit off site, dispensing legal advice. There is no unified "Contract & Project Management". The Project Managers are riding a beast they have no idea about. Devoid of information, they struggle and often get bitten by this beast which is supposed to benefit them but in reality turns out to be an Alien.

This session is designed to answer YOUR questions, and to help you to:

1. To decipher the Contract and what you have been contracted to do;
2. To understand the complexities that ride under the surface of your project, and your CONTRACTUAL obligations;
3. To make sense of key clauses in your contract

And most of all, to turn that "Alien Contract" into YOUR FRIEND !

Invited Guest Speaker

**P. Sivananthan LLB, CLP, PgD Tech Mgt
Billion Dollar Contract Management
Specialist**
